TripleL Trading shopping online

Team 11
Jia Liu, Lingchen Li, Chao Li

Background

- Have you ever been tired of running around to buy something urgently?
- Have you ever wanted something but cannot find it in online stores?
- Have you ever imagined that when you want something, various merchant would contact you to provide best offers?
- You can not get it in traditional B2B or B2C mode!

Idea & Goal

- Idea: If customers say what they want, supplier would contact with customers actively to provide their offers

- Goal: Construct a platform in which the buyer can put up what they wants, and the sellers search to bid on the orders

Plan of Next Phase

- For customer part:
  - All pages including managing personal transaction, reviewing items posted by sellers
  - Finish the customer interaction with sellers such as posting new wishing item, accept offers .etc
- For seller part:
  - The flow of goods in the store: posting new item, update inventory, .etc
  - creating order for specific customer
  - Construct wallet: customer pay money to seller

Thank You!
